

Sagar Sanjay Ulagadde *Software Engineer*

 sagarulagadde5883@gmail.com  +91 8669301878  Pune  DOB- 2001-02-28  Gender- Male

OVERVIEW

Full Stack Developer with 1 year of experience creating scalable web applications using JavaScript, React, and Node.js. Skilled in AWS cloud services and API testing with Postman to deliver secure, reliable integrations. Strong problem-solving abilities with a focus on performance and user experience. Passionate about continuous growth and contributing to innovative, high-quality project

PROJECT

Voice Aided ATM System, Environment: ASP.net 2019, My SQL

- Enables users to interact with ATMs using voice commands, enhancing accessibility and ease of use.

RankUI

- Developed and optimized responsive MERN applications with modern UI, RESTful APIs, and scalable performance. Collaborated across teams using Git, reviews, and Agile practices to deliver secure, high-quality solutions.

SKILLS

React.js

Building dynamic, component-based user interfaces

TypeScript

Enhancing JavaScript with static typing for better scalability

Node.js

Server-side JavaScript runtime for scalable applications

Bootstrap

Rapid UI development with responsive, mobile-first components

GIT

GIT, GIT Hub, Visual Studio

JavaScript (ES6+)

Writing clean, modular, and efficient code with modern syntax

Angular

Developing structured, enterprise-level single-page applications

Express.js

Lightweight framework for building RESTful APIs and web servers

AWS

EC2, S3, RDS, IAM, VPC,

WORK EXPERINCE

04/2025 – Present
Pune

Project Name - RankUI, Tecspeak IT Solutions Pune

- Develop responsive, scalable web applications using MongoDB, Express.js, React.js, and Node.js.
- Build modern UI/UX components using React.js and related tools.
- Develop RESTful APIs and integrate them with front-end components.
- Optimize application performance for speed and scalability.
- Work closely with project managers, tech-leads and stakeholders to understand requirements and deliver timely solutions
- Worked with team members using pull requests, code reviews, and issue tracking to streamline development
- Used Git for tracking code changes, branching, and merging to maintain clean project history.
- Maintain code quality through proper testing, debugging, and documentation.
- Participate in requirement discussions and contribute ideas for improvement and innovation.
- Monitor server health and optimize performance with CloudWatch
- Deploy and manage Node.js/Express backend services on EC2 instances.
- Implement bucket policies and IAM roles for controlled access.
- Trigger Lambda functions via API Gateway or S3 events.

EDUCATIONAL SUMMARY

- | | |
|------|--|
| 2025 | Bachelor of Computer Application , Shivaji University, Kolhapur <ul style="list-style-type: none">• First Class |
| 2025 | Master in Computer Application , Indira Gandhi University, Pune <ul style="list-style-type: none">• Perusing [First year] |

★ DATABASE & TOOLS

MongoDB/DynamoDB

- NoSQL database for flexible, document-based data storage

MySql

- Developed and optimized MySQL databases to support scalable web applications and ensure efficient data management

Postman

- Define API endpoints, request methods, parameters, and response structures using Postman's schema and documentation features.

HOBBIES

- | | |
|---------------------|------------------------------------|
| • Organic gardening | • Playing indoor and outdoor games |
|---------------------|------------------------------------|
